

Contents of volume 37

Volume 37, Nr. 1, 30 June 1998

- 1 *R.J. Kuo and K.C. Xue*
An intelligent sales forecasting system through integration of artificial neural network and fuzzy neural network
- 17 *Y. Xue, R.M. Kieckhafer and F.F. Choobineh*
Automated construction of GSPN models for flexible manufacturing systems
- 27 *K. Tang, L.-L. Chen and S.-Y. Chou*
Optimal workpiece setups for 4-axis numerical control machining based on machinability
- 43 *E. Nissan and A. Galperin*
Refueling in nuclear engineering: the FUELCON project
- 55 *Z. Bao and H. Grabowski*
Converting boundary representations to exact bintrees
- 67 *U. Roy and J. Liao*
Application of a blackboard framework to a cooperative fixture design system

Volume 37, Nr. 2, September 1998

Special issue: Industrial Applications of Knowledge-Based/Expert Systems

Editorial

- 83 *D.N. Batanov*
Industrial applications of knowledge-based/expert systems

Papers

- 87 *C.Q. Hung, D.N. Batanov and T. Lefevre*
KBS and macro-level systems: support of energy demand forecasting
- 97 *Z.A. Vale, M.F. Fernandes, C. Rosado, A. Marques, C. Ramos and L. Faria*
Better KBS for real-time applications in power system control centers: the experience of SPARSE project
- 113 *P. Burrell and D. Inman*
An expert system for the analysis of faults in an electricity supply network: problems and achievements
- 125 *S. Myint and M.T. Tabucanon*
The framework for an expert system to generate alternative products in concurrent engineering design
- 135 *A. Lekova and D. Batanov*
Self-testing and self-learning fuzzy expert system for technological process control
- 143 *M. Rao, H. Yang and H. Yang*
Integrated distributed intelligent system architecture for incidents monitoring and diagnosis
- 153 *C. Frasson and E. Aïmeur*
Designing a multi-strategic intelligent tutoring system for training in industry

Volume 37, Nr. 3, November 1998**Special issue: Intelligent Manufacturing Systems****Editorial**

169 *P. Valckenaers*

Intelligent Manufacturing Systems

Papers

171 *J.P.T. Mo and C. Menzel*

An integrated process model driven knowledge based system for remote customer support

185 *A. Sluga, M. Jermol, D. Zupanič and D. Mladenčić*

Machine learning approach to machinability analysis

197 *J.-F. Pétin, B. lung and G. Morel*

Distributed intelligent actuation and measurement (IAM) system within an integrated shop-floor organisation

213 *L. Gou, P.B. Luh and Y. Kyoya*

Holonic manufacturing scheduling: architecture, cooperation mechanism, and implementation

233 *L. Rannanjärvi and T. Heikkilä*

Software development for holonic manufacturing systems

255 *H. Van Brussel, J. Wyns, P. Valckenaers, L. Bongaerts and P. Peeters*

Reference architecture for holonic manufacturing systems: PROSA
